SUMMARY

Informatics Engineering student (UPM & EPFL) and AWS-certified developer with hands-on experience building backend systems (Java, Spring Boot, and RESTful APIs) and modern frontend applications (React, Vite). Leveraging a strong entrepreneurial background in automating business operations, I am actively seeking a software engineering position to design scalable solutions and drive technical impact.

EDUCATION

EPFL — Swiss Federal Technology Institute of Lausanne

Lausanne, Switzerland

Computer Science, Exchange year

Sep, 2025 — Jun, 2026

- **Relevant work:** distributed algorithms, system design, research project, machine learning

Technical University of Madrid

Madrid, Spain

Informatics Engineering

Graduation: Jun 2026

WORK EXPERIENCE

- **Freelance Web Developer & IT Consultant:** Designed, built, and deployed a modern, responsive portfolio website for an architecture firm from scratch using React and Vite, significantly improving their digital presence and client showcasing capabilities. Managed the full project lifecycle, from gathering initial business requirements, designing the UI/UX to technical implementation and final delivery.

Jan 2026 - Present

- **La Terraza Co-Founder:** Built a summer social club brand and managed it to improve sales, productivity and business processes with the use of technological. My main responsibilities were: building of an automatic digital system for accounting, inventory, sales and staff, process optimization and human resources (talent acquisition and staff scheduling).

Summer 2023-2024-2025

ONGOING PROJECTS

Avalohost | **Co-Founder & Backend Engineer (In Progress)**

Tech Stack: Java, Spring Boot, PostgreSQL, AWS (EC2, RDS), RESTful APIs.

- **Architecture & Deployment:** Architecting and deploying a highly available, multi-tenant SaaS booking platform using Java, Spring Boot, and AWS (EC2, RDS) to reliably handle concurrent user reservations for partner sports centers.

TECHNICAL SKILLS

- **Languages:** Java, C, JavaScript, python, SQL.
- **Frameworks:** Keycloak, Spring boot, Spring MVC, Spring Data JPA, Spring security, React, Vite, Tailwin CSS
- **Cloud & Infrastructure:** AWS (EC2, S3, RDS, ELB, etc.), git, CI/CD (GitHub/gitlab).
- **API & Architecture:** RESTful Services, Client-server architecture, JSON, Postman, design patterns.
- **Databases:** Relational Database Design, PostgreSQL.

CERTIFICATIONS

- AWS Academy Cloud Foundations
- Cambridge English Advance

LANGUAGES

Spanish (Native). **English** (Advanced). **French** (DELF A2, currently learning).
